Subject: Deny Request to Deplete Upper San Pedro Basin Groundwater

Only 40 of 140 miles of the San Pedro is protected. Do your part (and our state's) to assure its continued survival and pivotal role in protecting wildlife and unique opportunities to expand eco-tourism. Arizona has plenty of housing. We don't need another 7000 new homes and should know by now that an economy based on new construction is made of sand.

Please use your considerable influence to assure this invaluable resource, and the lives it supports, is saved from extinction.
