Re: Application for a Designation of Adequate Water Supply
Pueblo del Sol Water Company (DWR No 40-700705.0000)
Administrative Completeness Review

Dear Ms. McJunkin:

The Arizona Department of Water Resources (Department) received your application for a Designation of Adequate Water Supply on June 23, 2011. During the Department's administrative review, it was determined that your application was incomplete. Specifically, the demand estimate submitted with the application is incorrect. Please submit a new estimate that includes the following:

1. "Current demand" is defined as the demand reported from the previous calendar year. Pueblo del Sol reported 1431 acre-feet withdrawn in the year 2010.
2. "Committed demand" is defined as the demand of recorded lots not yet served by the provider. Our records show 37 Water Reports with a total demand of 2503 acre-feet/year have been issued indicating Pueblo del Sol as the water provider (see attached spreadsheet). Please provide an estimate that includes these demands as either current or committed demands. If the lots associated with these plats have *not* been recorded, then they can be included as projected demand.
3. "Projected demand" should reflect the demands of development- not included in current or committed demands- projected to occur within the term of Designation

The Department is currently reviewing the hydrologic study submitted. If the Department determines that the hydrologic study is not correct, you will be notified of the incorrect items in a subsequent letter and will be provided time to respond.

If you have any questions regarding the contents of this letter or the application in general, please do not hesitate to contact Richard Obenshain at 602-771-8622

Sincerely,

Andrew J. Craddock, Manager, Recharge, Assured & Adequate Water Supply Program

AJC/rbo
